Certificate of Analysis

Product Name: vamPure™ Blood Nucleic Acid Extraction Kit

Catalog No.: K5011720 **Lot No.: _____**

Shipping Condition: Ship at Room Temperature

Storage Condition: Upon receipt, store Proteinase K at -20°C.

Shelf Life: 1 year from the date of receipt under proper storage conditions

Description
Components in this kit are prepared with pure chemicals according to proprietary technology. They are designed for the extraction and purification of genomic DNA from human whole blood.

Quality Control

- This kit is tested by extracting genomic DNA from human whole blood. The resulting eluted DNA is tested for yield and purity and compared to known yields and purity of the same control human blood to ensure efficacy and reproducibility.

Kit Components

1. vamPure™ Blood Nucleic Acid Extraction Kit
2. Certificate of Analysis

FOR IN VITRO RESEARCH USE ONLY **APPROVED BY:**_____
