

Frozen Tissue Array Certificate of Analysis

Product Name: Frozen Tissue Array

Catalog No.: T6XXXXXX

Shipping and Storage Condition: Dry ice and -70°C

Shelf Life: One year from the date of receipt under proper storage condition

Description

Frozen Tissue Array contains up to 45 tissue spots from different tissues on one slide. Each tissue core size is 2 mm diameter. Tissues were snap frozen in liquid nitrogen after excision, and embedded in OCT. Tissue arrays are 5-8 µm in thickness, and mounted on positively charged glass slides. The slides can be used for both immunohistochemistry and in situ hybridization. It is an ideal product for rapid cellular localization of RNA and protein expression.

Quality Control

Representative slides from each lot were stained with H & E.
