

Certificate of Analysis

Product Name: cfPure™ cfDNA Extraction Kit

Catalog No.: K5011610 K5011625

Lot No.: _____

Shipping and Storage Condition: Ship and store at Room Temperature

Shelf Life: 1 year from the date of receipt under proper storage conditions

Description

Components in this kit are prepared with pure chemicals according to the proprietary technology. They are designed for the extraction and purification of cell-free DNA from human plasma. This kit provides the necessary reagents to extract and elute DNA from human plasma.

Quality Control

- A representative kit of this lot is randomly selected and tested by extracting cfDNA from two sets of human control plasma. The resulting eluted cfDNA is tested for yield and purity and compared to known yields and purity of the same control human plasma samples to ensure efficacy and consistency.

Kit Components

1. cfPure cfDNA Extraction Kit
2. Certificate of Analysis
3. User Manual
4. MSDS

FOR IN VITRO RESEARCH USE ONLY
