

Certificate of Analysis

Product Name: PCR Mix

Catalog No: L5051100

Shipping Condition: Blue ice

Storage Condition: -20 °C

Shelf Life: One year from the date of receipt under proper storage conditions

Description

BioChain's PCR Mix contains Taq DNA polymerase, dNTPs, reaction buffer and Taq DNA polymerase enhancer. It is a 2 x concentrated solution. Just add equal volume of template and primers before start the amplification.

Quality Control

Each lot of PCR Mix was tested by PCR successfully, and the results are consistent lot to lot.

Protocol

Mix your template and primers, and add equal volume of PCR Mix, then start your PCR program.

Components

1. PCR Mix: 2.5 ml
2. One Certificate of Analysis

FOR IN VITRO RESEARCH USE ONLY
